Aims and Scope – What Does It Cover:

Current Pharmaceutical Design publishes in-depth reviews covering all aspects of current research in rational drug design.

Each edited issue of the journal is devoted to a single therapeutic area of major importance to modern drug design, including: medicinal chemistry, pharmacology, drug targets and disease mechanisms. The Executive Editor, who is an acknowledged authority in a therapeutic field, solicits manuscripts from leading researchers in the pharmaceutical industry and academia. General reviews provide latest and outstanding developments in the field.

Who Are Our Readers – Demographics and Circulation?

Current Pharmaceutical Design has a readership of 1500. Our readers are pharmacologists, medicinal chemists and researchers involved in pre-clinical medicine both in academia and in the pharmaceutical and biotechnology industries. A major percentage are senior researchers and decision makers.
