

SUBJECT INDEX TO VOLUME 9

- Affinity chromatography 55
 high-throughput phage display screening
 method using combination of 55
- AKT1-EGFP 342
 image analysis for 343
 optimization of 344
 redistribution assay of 342
- Alcohol dehydrogenase 290
 validating PURPALD screening system for 290
- Anti-endotoxin agents 27
- Antiinflammatory 426
 synthetic antioxidants as 426
- Antimicrobial 501
 role of arrays of biosensors 508
 role of bacterial *lux* genes 505
 role of bioluminescent reporters 505
 role of cell-free/living biosensors 502
 role of constitutive/inducible luminescent
 biosensors 507
 role of end-point/real-time biosensors 502
- Antioxidants 421,425
 anti-inflammatory activity of 425
 combinatorial library synthesis of 421
 in inflammatory disease 425
 natural type 436
 synthetic/natural type 425
- Antiviral aptamers 626
- Artificial neural networks 455
 for selection of appropriate thermal
 parameters 455
 role in classification of set of phenylcarbamic
 acid derivates 455
 use of 455
- Bacterial one-hybrid selection system 301
 for interrogating zinc finger-DNA
 interactions 301
- Biocatalysis 237,247
 by directed enzyme evolution 247
 effect of non-aqueous solvents 248
- Biocatalyst 247
 activity of 247
 altering enantio/regio-selectivity by 249
 altering substrate/cofactor specificity by 250
 improving thermostability by 251
 in controlling enzyme regioselectivity 250
 increasing expression/solubility by 252
 novel activities/products of 253
 role in product/substrate inhibition 248
- Biological targets 334
- Biphenyl ethers 449
 determination of LDH activity of 451
 in rat hepatocytes 449
 screening oxidative potential of 449
- Bisphenol A 747
- Branase mutants 260
 by permutation of modules or secondary
 structure units 260
 enzymatic activity of 260
 fitness landscape of 262
 foldability of 260
 intermediate states on fitness landscape 261
- C-16 modified artemisinin analogs 729
 anti-parasitic activities of 729
 biological assays of 731
 chemistry of 730
 evaluation of 729
 library of 729
- Caspase-3 activity 22
 assay using peptide array to determine 22
- Cell-based microarrays 375
- Cell microarray 210
- Chemoinformatics 95
 application of 95
 as tools in lead generation and optimization 95
 utilization of 95
- Chiral 1,2,3,4-tetrahydroquinoline library 691
 microwave-assisted solid-phase synthesis of 691
- Chronic inflammatory diseases 613
 mitogen-activated kinases as validated
 targets in 613
- Combinatorial chemistry 421
 role for novel antioxidants 421
- Combinatorial chemistry synthesis 465
 analysis of 465
 prediction of 465
 screening data of 465
- Combinatorial dispensing 785
 implementing inkjet printer concept for 786
 modes of 786
 performance of 788
 to create complex screens 785
- Combinatorial library 747
 for extraction of bisphenol A 747
 role for selective molecularly imprinted polymer
 form 747
- Combinatorial protein libraries 264
 by block shuffling 264

random multi-recombinant PCR (RM-PCR) for construction of	264	DNA-binding site locations	303
Combinatorial saturation mutagenesis	719	DNA microarrays	203,369,591
Combinatorial synthesis	583	assay formats in	369
Comparative molecular surface analysis (CoMSA) ...	753	DNA analysis by	369
for molecular diversity studies	754	modified oligodeoxynucleotide hybridization .	591
for virtual combinatorial library screening of ..	753	printed on nanoporous membrane slides	591
for virtual drug molecules	761	RNA analysis by	370
to study styrylquinoline HIV-1 blocking agents	753	to study DNA-protein interaction	371
Compounds pattern recognition	474	DNA/RNA aptamers	619
Computational methods	213	against whole organisms	627
alignment-independent 3D QSAR descriptors as	219	applications in molecular medicine	623
comparative molecular field analysis of	216	as anticoagulation agents	626
comparative molecular similarity indices analysis of	216	as tools for basic research	619
in developing quantitative structure-activity relationships (QSAR)	213	drug discovery based on	622
Computational prediction	103	for biomarkers	628
biological data of	105	SELEX method of	620
descriptor clustered training sets in	107	targeting inflammation markers	627
efficiency analysis in	110	therapeutic applications of	619,623
ISIS SKeys clustered training sets in	107	to block cell adhesion/invasion	628
of biological activity	103	Drug discovery	79
of compounds	105	integration of process R&D in	79
randomly generated training sets in	106	ECLiPS libraries	355
synthetic efficiency using	103	kinase assays of	355
use of descriptors	105	Elastase inhibitors	381
use of software/scripting	105	application of chemical arrays in screening of	381
Corporate databases	87	Enantioselectivity	249
analysis of	88	refining/reversing of	249
data source integration in	88	Endotoxin	599
developments of	91	treatment with regasepin2	602
flexibility of	90	Enzyme engineering	247
maximum ROI from	87	effect of cold adaptation	249
requirements for	90	effect of pH optimum	249
Cyclic ADP-ribose (cADPR)	633	Epoxide hydrolases	295
comparison of brain levels of	635	HPLC-analysis of	297
fluorometric cycling assay for	633	selection for activity of	296
Directed protein evolution	271	Filter paper-based assay	289
deciding on screening system for	285	for laboratory evolution of hydrolases/ dehydrogenases	289
designing right strategy for	285	semi-quantification of purple color spot intensity by	290
diversity challenge in	271	Fluorescence activated cell sorting	321
diversity strategy to	285	based screening	321
heavy metal/organic solvent-mediated epPCR methods in	277	for enzymatic activity	321
mixed methods for	277	in screening of compartments	326
mutation frequency in	272	in screening of displayed enzymes	321
PCR methods employing nucleotide analogue in	277	in screening of intracellular enzymes	323
RaMuS flowchart for	283	Fluorescence peptide chip	21
screening system in	284	development of	21
subsequent mutations/subset mutations in	272	for detection of caspase activity	21
		Fluorescence probe	23
		design of	23

- Fluorometric cycling assay 633
 efficiency of 633
 for cyclic ADP-Ribose 633
- Functional nanoparticles 389
 advanced applications of 392
 characteristics of 390
 microarray/nanotechnology applications of 389
- Functional proteins 265
 strategies for *in vitro* selection of 265
- Functionalized ionic liquids 229
 for peptide coupling 229
 for traceless catalyzed carbon-carbon
 coupling reactions 229
- Fungal laccases 719
 effect of combinatorial saturation
 mutagenesis 719
 engineering of 719
 in vivo overlap extension for 719
- Genetic diversity 281
 strategies for generating 281
- GHRP-2 176
- GHRP-6 176
- Globular proteins 262
 nature of building blocks for 262
- GluR-HEK293 cell lines 149
 fluo-4/AM assay of 149
 generation of 149
 identification of 149
 optimization of fluo-4/AM assay
 parameters of 150
 pharmacological characterization of 152
- Glycine transporter (GlyT-161b) 9
 development of novel high-throughput
 assay for 9
 investigation of 9
 ionic/substrate dependence of transporter of 11
 neurotransmitter transporter function of 9
 pharmacological characterization of
 transporter of 12
- Glycosidases 571
- Glycosyltransferases 571
- G-protein coupled receptor 37
 comparison of 37
 confocal/non-confocal imaging of 37
 desensitization-related β -arrestin
 redistribution of 37
- Gradient descent algorithm 559
 for minimizing amino acid coupling reactions 559
 role in synthesizing cyclic-peptide libraries 559
- Growth hormone releasing hormone 181
 plasmid-based expression technology using 181
- Growth hormone secretagogues 175
 clinical uses of 175
 ghrelin actions of 175
 types of 176
- Growth hormone-releasing factor 171
 active core of 171
 analogs using native molecules of 172
 cyclic analogs of 172
 degradation of 171
 protection for potent analogs 171
 structural modification of 171
- Growth hormone-releasing hormone (GH-RH) 163
 antagonists of 163
 as growth factor in tumors 164
 in oncology 163
- Growth hormone-releasing hormone antagonists 163
 effects on growth of experimental cancers 165
 in brain tumors 167
 in breast cancer 166
 in colorectal cancer 168
 in endometrial cancer 166
 in lung cancer 167
 in non Hodgkin's lymphomas 168
 in osteogenic sarcomas 168
 in ovarian cancer 166
 in pancreatic cancer 168
 in prostate cancer 165
 in renal cell carcinoma (RCC) 167
 mechanisms of action on tumors 165
 synthesis of 163
- Growth hormone-releasing hormone receptors 164
 in human cancers 164
- GST-Grp1 566
 cloning/expression/purification of 566
 labeling with terbium 566
- Hexarelin 177
- Hexarelin derivatives 177
- hGHRH analog 197
 comparative activity of 197
 in vitro activity assays of 198
 in vitro GH-releasing activity of 199
 purification of 198
- High content screening (HCS) 339
 for phosphoinositide 3 kinase inhibition 339
- High throughput screening (HTS) 123,331,515,599
 activity screening by 127
 ideas/queuing in 126
 identifying active molecules by 334
 of peptide library 599
- High-throughput selection system 295
 for assessing activity of epoxide hydrolases 295
- Hit-to-lead 95,123
 chemistry resource management in 126

- collaborative processes in 126
in high throughput library design/synthesis/
purification capabilities 123
library operations in 124
parallel synthesis platform in 124
role of medicinal chemistry 123
selecting right scaffold for 95
- HIV protease-activated molecular switches 313
based on alkaline phosphatase 313
based on beta-glucuronidase 313
DNA sequencing for 315
- Hochschild's one-hybrid system 304
modification of 304
- Homomeric ionotropic glutamate receptors GluR1-
GluR6 147
functional characterization of 147
in fluorescence-based high throughput
screening assay 147
molecular biology of 149
- Human cord blood mononuclear cells 777
isolation of 778
screening platform for compounds with
potential 777
- Human growth hormone releasing hormone
(hGHRH) 197
- Human secretome 639
analytical methods for 642
construction of expression vectors for 639
high-throughput mammalian protein
expression for 639
protein aliquoting/storage for 642
protein expression for 640
protein purification for 641
purification aliquoting for 639
storage pipeline to assemble library of 639
- IGF-1 344
effect on AKT1-EGFP translocation 344
- Iminosugars 571
as glycosidase/glycosyltransferase inhibitors .. 571
combinatorial approaches to 571
libraries by combined synthetic approach 579
libraries by scaffold decoration 573
libraries *via* synthesis of core structure 575
- Immunofluorescence 712
- Intramers 627
against whole organisms 627
- Ipamorelin 177
- Ketodihydronicotinic acid 663
biology of 667
chemistry of 664
derivatives by multiple parallel synthesis 663
in antimicrobial 663
- Kohonen self-organizing MAP (SOM) 474
- Lead generation 97
synthesis during 97
- Library design 97
- Lipase 290
validating PURPALD screening system for 290
- Lipopolysaccharides (LPS) 27
- Locked nucleic acid (LNA) 591
- Lux* genes 501
for high throughput applications 501
role of antimicrobials 501
whole cell strategies based on 501
- LY294002 567
inhibition of P13K- γ by 567
- MALDI-TOF mass spectrometry 22
- Matrix metalloproteinase 599
design/synthesis of inhibitor libraries of 602
- Medicinal chemistry 131
building block inventory/clustering in 132
efficiency improvements in 131
interactive tools for risk reduction in 131
library enumeration/analysis in 141
library risk analysis tools in 136
- Melatonin 409
developments of related antioxidant
compounds to 409
related antioxidant compounds 411
- Metallothionein-mimic decapeptides 535
fluorescent confocal microscopy of 537
fluorimetric characterization in solution 539
peptide sequences of 536
possible HG (II)/CD(II) signaling
mechanisms of 540
synthesis of 535
with heavy atom signaling properties 535
- Microarray 203,365,389
as tool for high-throughput analysis of
biological systems 365
as versatile platform for high-throughput
functional proteomics 203
developments in microarray slide coatings in . 365
improvement of 390
- MMP inhibitors 599
chemical synthesis of 600
inhibitory activity of 603
- Modified growth hormone releasing hormone
constructs 182
- Molecular descriptors 213,361
alignment-dependent 3D QSAR

- descriptors as 216
- automatic selection of 217
- comparative molecular moment analysis of 217
- constitutional descriptors as 215
- correlation based methods for 217
- 2D QSAR descriptors as 214
- 3D QSAR descriptors as 216
- 2D-versus 3D-QSAR approach to 217
- electrostatic/quantum-chemical descriptors as 215
- filtering methods for 217
- fragment-based descriptors/molecular fingerprints as 216
- from structure 213
- genetic algorithm of 218
- geometrical descriptors as 216
- grid-independent descriptors as 217
- mapping molecular structure to activity of 219
- mapping to activity of 214
- role of artificial neural networks 221
- role of hybrid methods 219
- role of sequential backward feature elimination 219
- role of sequential feature forward selection 219
- role of simulated annealing 219
- selection of 214
- topological descriptors as 215
- VolSurf as 217
- weighted holistic invariant molecular descriptors as 217
- Molecularly imprinted polymer 747
- Mono-/di-halogenated biphenyls 449
 - determination of LDH activity of 451
 - in rat hepatocytes 449
 - screening oxidative potential of 449
- Morchella esculanta* 443
 - antioxidant activity of 443
 - as wild edible mushrooms 443
 - free radical scavenging activity of 445,446
 - metal chelating activity of 447
 - superoxide anion radical scavenging activity of 444
- Morchella vulgaris* 443
 - antioxidant activity of 443
 - as wild edible mushrooms 443
 - free radical scavenging activity of 445,446
 - metal chelating activity of 447
 - superoxide anion radical scavenging activity of 444
- Mutagenesis method 271
 - non-bias mutational spectrum in 272
 - performance criteria for random type 271
 - transition/transversion indicators in 272
- N4-substituted 1,4-benzodiazepine-2,5-diones 743
 - chemistry of 743
 - soluble polymer support for 743
 - synthesis of 743
 - use of poly(ethylene glycol) 743
- NADPH regeneration 237
 - biocatalyst for 237
- N-alkyl hydroxamates 651
 - biological tests for 652
 - chemistry of 652
 - for inhibition of cancer cell proliferation 651
 - synthesis of 651
- Nitrogen-containing macrocycle 399
 - as host molecules 399
 - for recognition of undissociated phenol derivatives 399
 - mechanism of potentiometric signal generation of 399
- NK cells 778
 - isolation of 778
- NMR functional library 516
 - composition of 517
 - database for 516
 - design of 516
 - fast-NMR utilization of 520
- Non-contact dispensing 786
 - implementing inkjet printer concept for 786
 - modes of 786
 - performance of 788
 - solenoid-based 786
- Non-peptidic growth hormone secretagogues 178
 - benzolactam biphenyl tetrazoles as 178
 - quinazolines as 178
 - SM-130686 as 179
 - 4-spiropiperidines as 178
- Non-radioactive JNK3 assay 613
 - development/optimization of 613
 - enzyme kinetics of 615
 - mechanistic aspects of 615
 - modifications of 615
- Normalized relative entropy 49
 - numerical characterization of DNA sequences based on 49
- Odorants 583
 - as polyfunctional thiols 583
 - combinatorial synthesis of 583
 - screening of 583
- Oligodeoxynucleotides 492
- Oligosaccharide 63
 - synthesis of 63
- One-pot sequential glycosylation strategy 63
 - advances in 65
 - early notions of 64
 - library assembly by 63
 - oligosaccharide library assembly *via* 72
- Orphan nuclear receptors 683
 - as targets of drug discovery 683

- cell-based screening for 684
 computer-based virtual screening for 687
 direct binding assays for 685
 structure-based assays for 686
 transgenic mouse models for 684
- p38 MAP kinase inhibitors 351
 discovery of 351
 ECLiPS libraries for 351
 high-throughput screening of 352
 screening of large encoded combinatorial
 libraries for 351
- Palladium 703
- Pegaptanib 624
- Peptides 265
 strategies for *in vitro* selection of 265
- Peptide microarray 206,371
 applications of 372
 role in immobilization of pre-synthesized
 peptides 372
 role in *in situ* synthesis 371
- Peptidic growth hormone secretagogues (GHRPs) 176
- Phage peptide library 56
 construction of random 56
- Pharmaceutical analyses 3
 direct LC-MS/MS for 5
 fast HPLC-MS/MS for 3
 fast mass spectrometry-based methodologies for 3
 MALDI-MS/MS for 6
 micro/nanospray-MS/MS for 5
 SFC-MS/MS for 5
- Phosphite dehydrogenase 237
 directed evolution of 237
- Phosphoinositide 3-kinase (PI3Ks) 339,565
 activity of 565
 AKT1-EGFP redistribution assay
 optimization of 341
 AKT1 redistribution assay of 339
 directly labeled TR-FRET assay for 565
 inhibition of sensor complex by unlabeled 567
- PI3K inhibitors 344
 automated dose-response testing for 344
- Plasmid technology 181
 applications of 184
 as method for physiologically stimulating
 long-term growth hormone secretion 181
- Programmable one-pot synthesis 65
- Protease substrate 481
 evaluation of 481
 optimization of 481
- Proteins 259
 by block shuffling 259
- candidates for building blocks of 259
 creation of novel type 259
 permutation of secondary structure units of 263
- Protein coding genes 49
 recognition of 49
 in yeast genome based on relative-entropy
 of DNA 49
- Protein crystallization 788
- Protein microarray 207
- Protein targets 515
 chemical library for 516
 design/characterization of functional
 library for 515
 NMR screening against 515
- Protein/antibody microarrays 373
 applications of 374
- PS-wang-decapeptide-NH₂ library 542
 synthesis of 542
- Pyridazin-3(2H)-one libraries 15
 three-component palladium-catalysed
 synthesis of 15
- L-Pyridylalanine 599
 containing metalloproteinase inhibitor 599
 identification of racemization of 600
 inhibition of lethal endotoxin shock with 599
- Quantitative structure-activity relationship (QSAR) .. 213
- Random mutagenesis methods 273
 cassette mutagenesis as 277
 classification of 273
 codon-based mutagenesis as 278
 enzymatic methods employing reverse
 transcriptase/klenow fragment as 275
 enzyme based methods as 273
 mutator plasmids for directed evolution of
 host organisms in 276
 mutator strains in 276
 PCR methods under low fidelity
 conditions as 273
 performance of 280
 random elongation mutagenesis (REM) as 278
 random insertion/deletion (RID)
 mutagenesis as 278
 randomization of codons as 275
 sequence saturation mutagenesis (SeSaM) as 279
 site-directed hybridization mutagenesis as 279
 synthetic chemistry based methods as 275
 whole cells based methods as 276
- Real-time PCR 55
 high-throughput phage display screening
 method using combination of 55
 quantification of phage amount by 56

- Regasepin2 605
 against endotoxin shock 605
- Reverse transfection 712
- RNA aptamers 491
 binding affinities of 493
 binding to live trypanosomes 496
 energy minimization modeling of 493
 localization of 496
 role on domain of live African trypanosomes 491
 selection of surface-binding 493
 serum-stable type 491
 structural characterization of 494
- Saccharomyces cerevisiae* 719
 in vivo overlap extension/cloning in 721
 production of MtLT2 in 720
- Self-organizing maps 473
 application of 473
 in combinatorial libraries comparison/
 library design 478
 in dataset splitting 477
 role in combinatorial library design 473
 role in compounds pattern recognition 473
 role in discrimination drug-like/nondrug-like
 molecules 477
- Sequence analysis 333
- Sequential screening 115
 comparison of methods for 115
 methods of 117
 of large compound sets 115
- SM-130686 187
 anabolic effect of 193
 as orally-active growth hormone secretagogue 187
 binding activity with GHS-R 189
 clinical application of 194
 effect on hypophysectomized (HPX) rats 191
 effect on intracellular Ca²⁺ concentrations 190
 in vitro effect on GH release 190
 in vivo effect on GH release 191
 linear growth effect on monosodium glutamate
 (MSG)-treated rats 192
 pharmacological profile of 187,189
 pharmacological profiles in comparison with
 rhGH/GHSs 194
 synthesis of 187
- Small-molecule microarray 206
- Species-specific GHRH constructs 183
- Styrylquinoline anti-HIV 760
 3D QSAR/4D QSAR modeling of 760
- Substituted polyamine library 27
 high-affinity lipopolysaccharide-binding
 compounds in 27
- Suzuki cross-coupling reactions 703
 minimization of palladium content in 703
- Tabimorelin (NN703) 177
- Tetrahydro-1,2,4-triazolo[5,1-b]quinazolin-8(4H)-one 771
- Tetrahydrobenzimidaze[1,2-b]quinazolin-1(2H)-one 771
 solvent-free conditions for 771
 synthesis of 771
- Thiol synthesis 586
 analytical methods of 586
- Tricyclic farnesyltransferase inhibitors 545
 characterization of resynthesized
 compounds from 554
 FTase/GGTase-1 enzyme assays of 547
 library screening protocol for 548
 library synthesis of 546
 rat liver microsome (RLM) stability assay of 550
 structure-activity relationships of 545
 using ECLiPS[®] libraries 545
- Trypanosoma brucei* 491
- Trypanosoma cruzi* 628
- Virtual combinatorial library (VCL) 753
- Virtual screening 359
 generation of virtual ligands in 359
 optimization of 361
 pseudo-ligand approach to 359
- v-Src mutant protein 711
 confocal laser scanning microscopy
 (CLSM) of 713
 image analysis of 712
 parallel analysis of 711
 reverse transfection cell arrays for 711
 wide field fluorescence microscopy of 712
- Wang-decapeptide-lariat ether 543
 preparation of 543
- Whole cell-based biosensors 508
 regulatory regions for 508
- WST assay 778
 determination of cell proliferation 778
- Zinc fingers (ZF) 301
 binding to site 5'GGGGCAGAA-3' 307
 construction of library of binding sites at 304
 construction of random library of 304
 evaluation of one-hybrid systems for 303
 optimization of fusion/reporter plasmids for ... 303
 plasmids for 303
 selection of 304
