

SUBJECT INDEX TO VOLUME 6

- Activated protein C (APC).....405
 in fibrinolysis408
 in regulation of coagulation405
 in treatment of sepsis.....409
 in vasculare.....405
 induced intracellular signaling406
 Alternative promoters 281
 in human/mouse genes 281
 Ancestral protein.....368
 for tissue factor cytokine receptor class II family ...368
 from secretion system II.....368
 Anti-atherosclerotic therapy.....487
 using microgravity for.....487
 Antisense transcripts621
 genome wide identification of.....621
 AP-1 protiens351
 functions of.....351
 phosphorylation of354
 role in apoptosis353
 role in tumor suppression.....352
 role in tumorigenesis.....352
 target genes of members of353
 Apoptosis609
 core apoptotic machinery in.....609
 genes in.....609
 implications for cancer therapy.....609
 ARE-mRNA stability.....475
 signaling pathways regulating.....475
Aspergillus nidulans genome..... 180
 intracellular oligosaccharide degrading
 enzymes from 180
Aspergillus nidulans ORFs 178
 function assignment of..... 178
 Associomics547
 from LD-mapping to547
 Atherosclerosis.....411,439
 acute consequences of411
 CCR2 in.....416
 CCR5 in.....416
 cellular adhesion molecules in412
 chemokines in.....415
 chemokine receptors in416
 coagulation proteins in440
 CX3CR1 in.....416
 cytokines in417
 E-selectin in.....412
 gelatinase in.....422
 hypercoagulability in.....443
 ICAMI in.....413
 in sights from genetic.....411
 interleukin-1 cluster in419
 lymphotoxin-alpha (LTA) in.....418
 matrix metalloproteinases in420
 MMP-1 in421
 MMP-3 in421
 MMP-9 in 422
 monocyte chemoattractant protein-1 (MCP-1) in 415
 other chemokines in.....415
 PECAMI (CD31).....414
 platelet collagen receptor (GPIa/IIa).....415
 platelet membrane receptor glycoprotein IIb/IIIa
 (GPIIb/IIIa) in.....414
 P-selectin in413
 P-selectin glycoprotein ligand-I413
 thrombogenicity in439
 tumor necrosis factor alpha (TNF-) cluster in 417
 Atherothrombosis.....439
 blood coagulation in.....439
 risk in.....439
 Autosomal dominant hypercholesterolemia..... 535
 Avian functional genomics 78
 Avian genomes.....75
 as resources75
 for vertebrate biology.....75
 MAPS/sequence comparisons of78
 BCR/ABL gene 89
 in vivo models expression of..... 89
 Biased embryos147
 and repeat expansions/contraction.....147
 Birds .. 75
 as models for biomedical research.....75
 Bisulfite sequencing.....493
 Breast carcinogenesis129
 BMI-1 in133
 effect of aging132
 effect of histone deacetylation129
 epigenetics of129
 regulation *via* effects of promoter methylation.....130
 role of senescence132
 role of telomerase.....132
 stem cells in132
 Breast metastasis129
 BMI-1 in133
 effect of aging132
 effect of histone deacetylation129
 epigenetics of129
 regulation *via* effects of promoter methylation.....130
 role of senescence132
 role of telomerase.....132
 stem cells in132
Caenorhabditis elegans..... 97,580
 considerations of.....105
 disease gene models using.....101
 genomic resources for non-model583
 in compendium studies.....102
 in toxicology studies.....102
 microarray studies compared to other organisms...105

sex determination	580	effect of signaling skeletal muscle cells	294
studies in aging	100	expression of	302
studies in cell biology	101	gene mutations of	297
studies in development	98	in cardiomyopathy	309
<i>Caenorhabditis</i> genomics	579	in distal myopathy	297
for evolutionary developmental biology	579	in Duchenne muscular dystrophy	297
Cancer	82,253,377	in hyperCKemia	297
as stem cell disease	83	in limb girdle muscular dystrophy	297
downstream coagulation factors in	380	in muscle function	293
genetics of	82	in muscle pathology	293
HDLG/HSCRIB expression in	253	in muscular dystrophy	309
HUGL-1 expression in	254	in rippling muscle disease	297
specificity of	82	linked muscle disease	297
TFPI in	377	p104I caveolin-3 mutant transgenic mouse to study	307
Cancer genotype-phenotype correlations	83	role on β 1 adenosine receptor	306
in mouse models	83	role on β -adrenergic receptor (β -AR)	304
Cancer metastasis	333	role on $\text{Na}^+/\text{Ca}^{++}$ exchanger	306
METCAM/MUC18 expression in	333	role on nitric oxide synthase (NOS)	304
METCAM/MUC18 in	324	role on small GTPase	304
Cancer therapy	461,610	role on sodium channel	306
apoptosis regulation in	610	role on T-tubules	306
Bcl-2 protein in	610	Wt caveolin-3 transgenic mouse to study	306
inhibitor of apoptosis proteins (IAPs) in	610	Cell adhesion molecules (CAMs)	333
natural compounds in	461	Cell death	610
role of coagulation in	461	caspase-independent non apoptotic modes of	610
Cardiovascular disease (CVD)	115	Central nervous system	13
Caveolin	293	adeno-associated virus (AAV) vectors in	20
and A45T	300	adenoviridae in	14
and A45V	300	alphavirus vectors in	25
and A92T	301	and viral vectors	13
and C71W	301	CAV-2 vectors in	17
and c-src	296	DNA virus vectors in	14
and D27E	299	gene transfer to	13
and Del 63TFT65	301	herpes simplex virus (HSV) vectors in	22
and Del 97F	302	lentivirus vectors in	26
and EGF-R	296	nonhuman adenoviridae in	17
and G55S	300	RNA virus vectors in	25
and GPI-linked proteins	296	simian virus-40 (SV40) vectors in	24
and insulin receptor	296	Checkpoints	564
and L86P	301	in repeat tract	564
and N32K	300	Chicken repeat (CR1) elements	78
and P104L	302	Cholesterol	116,117
and P28L	300	and drug transporter proteins	116
and P28T	299	Choroidal neovascularization	315
and p38 MAP kinase	296	surgery for	316
and PDGF-R	296	therapies for	316
and phospholipase D	296	Chromatin assembly factor (CAF)	228
and R125H	302	Chromatin assembly factor 1(CAF-I)	229
and R26q	298	contribution to APC-dependent chromatin assembly	235
and S61R	301	subunit functions of	229
and T64P	301	Chromatin assembly	227
and V43E	300	conserved factors of	227
and V57M	300	conserved molecular mechanisms of	227
animal models study	306	control of	233
caveolin-1 null mouse to study	308		
caveolin-3 null mouse to study	307		
caveolin-3/caveolin-1 double null mouse to study	308		

from static to dynamic process.....	227	Epigenomics.....	491
from yeast to man.....	227	Factors VII/X genes.....	385
regulation of.....	233	FANTOM3.....	619
ubiquitin-targeting pathway of.....	233	Forward genetics.....	585
Chromatin re-organization.....	530	in sex determination of satellite species.....	585
at identified enhancer sequences.....	530	Fragile syndrome.....	515
Chronic myelogenous leukemia (CML).....	89	phenotype in.....	515
BCR/ABL-positive mice of.....	89	targets for.....	515
conditional BCR/ABL transgenic mice of.....	92	therapy for.....	520
conventional BCR/ABL transgenic mice of.....	90	Fragile X mental retardation protein.....	515
transgenic mouse models of.....	89	as RNA binding protein of.....	515
c-JUN gene.....	356	function of.....	519
repression of RA-mediated transcription of.....	356	identification of.....	516
Cloned susceptibility gene.....	210	<i>in vitro</i> approaches.....	516
for human uric acid nephrolithiasis.....	210	<i>in vivo</i> approaches.....	516
CNS regions.....	530	interacts with RNA-binding protein.....	517
for exploring mechanisms of disease.....	530	RNA binding domains.....	515
Coagulation network.....	383	Full-length cDNA collection projects.....	270
coagulation FVII/FX genes in.....	383	Full-length cDNA resources.....	270
Complex disease.....	551,208	based full-length cDNA library methods.....	270
genes on DNA level candidate gene approach to... 552		functional analysis of genes by.....	278
genes on protein level.....	556	generation of.....	270
genes on RNA level.....	556	human transcriptome of.....	277
high-throughput strategy to find genes in.....	556	integrative annotation of.....	277
population choice for.....	208	large-scale identification/characterization of	
strategies to identify.....	551	putative promoter regions using.....	279
Cytokine receptor family.....	367	FVII/FX deficiencies.....	391
archetype of.....	367	missense mutations in.....	392
Cytosine.....	491	molecular genetic of.....	391
genome wide modifications of.....	491	mutational spectrum of.....	391
Disease.....	491	mutations affecting catalytic domain in.....	394
Disease susceptibility genes.....	557	mutations affecting Gla domain in.....	392
DNA microarrays.....	494	mutations affecting signal sequence of.....	392
<i>Drosophila</i>	153,254	mutations in activation domain in.....	393
functional genomics of.....	254	mutations in promoter region in.....	392
normal cell migration/invasion in.....	254	nonsense mutations/gene abnormalities in.....	392
RNAi screens in.....	254	splice sites mutation in.....	392
<i>Drosophila</i> neoplasias.....	251	FVII/FX proteins.....	386
in understanding of human cancers.....	251	Gastrointestinal lipid absorption.....	116
<i>Drosophila</i> neoplasia suppressors.....	252	by apolipoprotein E (apo E).....	117
human homologs of.....	252	role of lipoprotein transport in.....	117
Drug.....	115	Gene expression.....	97,524,613
adenosine triphosphate binding cassette in.....	116	analyzing long-range regulation of.....	524
microsomal triglyceride transfer protein (MTP) in.....	116	developmental/biological insights from.....	97
pharmacokinetic variability of.....	115	growth factor induced.....	613
pharmacodynamic variability of.....	116	profiling of <i>Caenorhabditis elegans</i>	97
role of subfamily G member 5/8 transporters		Gene polymorphisms.....	116
(ABC-G5/8).....	116	adipocyte targeted drugs in.....	122
EGFR network.....	614	CETP inhibitors in.....	122
Endothelium progenitor cells (EPCs).....	434	effect of hypolipidemic drug action.....	116
Epigenetics.....	137	hydrolysis of.....	117
and differentiation.....	137	in atherosclerotic pathophysiology.....	116

Gene regulators	523	Human genome sequence.....	207
in evolutionarily conserved non-coding sequences.....	523	for susceptibility gene finding	207
Genomic reagents.....	76	impact of	207
current status of	76	Human genome variation	546
in avian species	76	in disease	546
Genomic resources.....	210	Human PrP gene (<i>PRNP</i>).....	1
in search of susceptibility genes	210	incubation time in mice.....	3
Haemophilia B	401	Human races.....	215
as clinical problem	401	classifying people vs understanding diversity of... ..	215
RNA-based gene therapy for.....	401	diagnostic alleles of.....	218
Hemostasis	461	genetic variances of.....	218
cross-talking with angiogenesis	461	inferring population structure of.....	220
Hepatic LDL	117	isolation by distance	221
Histone acetyltransferase (HAT)	357	lists of	217
HLA alleles	109	subdivision of	221
comparison of	111	IGF-I	614
double-locus haplotype frequencies of.....	111	IGF-II	614
gene frequencies of.....	110	Inflammation	407,455
genetics characteristics of.....	109	acute phase reaction in	455
in Shanghai Han population	109	EPCR in.....	407
three-locus haplotype frequencies of.....	111	TM in.....	407
HLA haplotypes	109	Inflammatory disease loci	46
characteristics of	111	overlapping with PSORS intervals	46
comparison of	111	Inherited disease.....	545
double-locus haplotype frequencies of.....	111	on genomic scale	545
gene frequencies of.....	110	Insect development	571
genetics characteristics of.....	109	comparative approaches to.....	571
in Shanghai Han population	109	genetic/genomic tools to study	575
three-locus haplotype frequencies of.....	111	genome project in	575
HSP90	151	in <i>Drosophila</i>	572
to regulate CPG methylation	151	in intermediate germ insect	571
Human cancer	81	in red flour beetle <i>Tribolium castaneum</i>	571
as genetic disease.....	81	RNAi studies of.....	573
Human cancer genotype-phenotype.....	81	Insulin.....	614
correlations in mice	81	Introns	589
in men	82	function of	591
modeling of.....	81	non-coding RNA in	592
Human cancer recapitulating genotype-phenotype	84	statistics of.....	589
correlations	84	JUN dimerization protein 2 (JDP2).....	351
mouse model of	84	as novel BIZP protein.....	353
Human epigenome project	496	histone-binding domain of.....	357
Human genes.....	277	in cell differentiation	356
annotation efforts for.....	277	in regulation of cell cycle	356
annotation of.....	277	inhibition by	357
functional analysis of	277	intrinsic nucleosome-assembly activity of	357
Human genome	269,589	mediated repression of transcription	358
5'-end data~ construction of	282	multifunctional transcription factor in	351
alternative splicing in.....	278	mammalian cells.....	351
based on large-scale full-length cDNA resources..	269	multiple interactions with DNA	359
functional analysis of	269	mutation of	358
initiation of large-scale projects in.....	284	on RA-mediated differentiation of F9 cells.....	359
to study control mechanisms of transcriptional	279	transformation of	356
network.....	279		

LDL receptor.....	117	Mouse	81
Lipid absorption	120	Mouse Nkx2-5-GFP-BAC clone.....	523
Lipidic metabolism	115	long range regulatory sequence of.....	523
adenosine triphosphate binding cassette in.....	116	progressive deletions of.....	523
by lipoprotein lipase (LPL).....	117	role of wild type/mutant 511-loxp transposons	526
drugs influencing	115	mRNA stability	471
HMG-CoA reductase inhibitors in	121	clinical applications of.....	478
HMG-CoA synthase inhibitors in.....	121	coding region determinants of.....	472
microsomal triglyceride transfer protein		determinants of	471
(MTP) in	116	in biogenesis	478
other target genes.....	120	in disease	480
peroxisome proliferator-activated receptor		molecular mechanisms regulating.....	471
- γ (PPAR) agonist drugs	121	physiological/pathological significance of.....	471
pharmacogenetics of	115	regulation by siRNA/miRNAs	478
role of sterol regulatory element binding		role of CU rich elements	477
factor-1 (SREBF-1).....	116	role of 3'-UTR elements.....	473
role of subfamily G member 5/8 transporters		role of 5'-UTR elements.....	471
(ABC-G5/8).....	116	role of AREs.....	473
SREBF cleavage activating protein (SCAP) in	116	role of ARE-binding proteins	473
Low-density lipoprotein (LDL)	115	role of AUF1	473
		role of HuR/Hu4.....	474
		role of IRES.....	472
		role of JRE.....	472
		role of nonsense-mediated mRNA decay (NMD)..	477
		role of poly(A) tail.....	477
		role of SLDE	477
		role of TTP	474
Macular degeneration.....	315	Myeloid progenitor cells	137
angiostatic gene transfer for.....	316	cellular differentiation of	137
role of antisense oligonucleotides (AON).....	316	epigenomic viewpoint on.....	137
role of pigment epithelium-derived growth		in leukemogenesis.....	137
factor (PEDF).....	316	Myelopoiesis	138
role of vascular endothelial cell growth factor.....	316	microenvironmental effects on	140
Major histocompatibility complex (MHC)	39	signal transduction in	140
Major psoriasis gene (PSORS1)	39	Myocardial ischemia	449
fine mapping of.....	40	apoptosis/necrosis in.....	455
Mammalian genome.....	592,619	coagulation after	455
complex transcription mechanisms in.....	619	cytokines in.....	450
splicing arbitrary transcription of.....	592	inflammatory reaction in	450
Mass spectrometry	495	leukocytes in.....	453
Melanoma metastasis	335	studies using transgenic/knockout mice	449
MUC18 in.....	335	Natural compounds	463
Metastasis.....	337	in cancer prevention/treatment	463
mechanism of human/MUC18 mediated	337	inhibition of expression/activity of matrix	
METCAM/MUC18 expression in.....	344	metalloproteinases by	464
Methylation sensitive restriction enzymes.....	492	<i>in vivo</i> antiangiogenic properties of	465
Methyl-cytosine binding protein assays.....	494	Natural products	463
Microarray studies	103	in regulation of VEGF expression.....	463
coupling of.....	103	Neoplasia suppressor genes	251
in genetics	103	and SCRIB.....	2552
Microarray technology.....	257,557	link to APC/HPV E6 oncoprotein	252
application to study NCL disorders.....	258	Neural apoptosis regulated convertase 1 (Narc-1).....	535
in inflammation	258	Neuroblastoma	319
in regulation of immune-related genes.....	258	allelic loss in.....	322
role in energy metabolism	262	chromosome loss/gain in	320
sources of biological samples for.....	258		
to study neuronal ceroid lipofuscinoses	257		
to study proteases	263		
to study proteolysis	263		
Monogenic disease genes.....	545		
characteristics of.....	545		

- DNA ploidy in.....320
 expression of neurotrophin receptors in.....323
 molecular/biological heterogeneity in.....319
 MYCN amplification in320
 role of biological/molecular markers in320
 telomers/telomerase biology in323
 tumor suppressor gene in322
- Neurological disorders536
 clinical implications of.....565
 origin expansion of.....563
 pathogenesis of.....565
- Neuronal function 260
 regulation of genes in..... 260
- Neurons 28
 transduction *vs* survival of..... 28
- Nkx2-4 gene.....524
 mapping long-range regulators in524
- Nkx2-5 gene.....526
 complex long-range regulation of.....526
- Non-MHC psoriasis susceptibility loci..... 45
 current state of research of.....45
 future directions for47
 searching for 45
- Non-protein-coding RNAs..... 277
- Novel genes..... 157
 encoding specific plant cell wall degrading
 enzymes 157
 identification of..... 157
 value of genome sequences in 157
- Ocular angiogenesis315
 biology of315
- Ocular neovascularization.....315
 genomic implications of.....315
 role of pigment epithelium-derived growth factor ..316
 role of vascular endothelial cell growth factor.....316
 surgery for316
 therapies for.....316
- Oxidative injury453
 by anti-oxidants.....453
 by reactive oxygen species.....453
 complement system in.....454
 heat shock proteins (HSPs) in454
- Parkinson's disease (PD) 241
 cellular/animal models to genomics of 241
 genomic/proteomic analysis of models..... 245
 invertebrate models of..... 244
 mammalian models of..... 242
 yeasts cellular models of 244
- Pc9535
 and LDL receptor539
 and SREBP transcription factor539
 as actor in autosomal dominant
 hypercholesterolemia535
- autoprocessing of..... 538
 in liver..... 540
 mutants of 538
 natural mutants of..... 536
- PCSK9* (proprotein convertase subtilisin/kexin type 9).... 535
- Pharmacogenomics 115,120
 candidate genes in 120
 role of cytochrome P₄₅₀ enzymes in..... 115
 role of phase II enzymes in 116
- Pigment epithelium derived factor (PEDF).....597
 antiangiogenic functions of 597
 as potent antiangiogenic therapy 599
 biological activity of..... 598
 ecto-protein kinase activity of 602
 exo-protein kinase activity of 603
 extracellular phosphorylation of 602,603
 gene induction by 601
 in cancer 600
 inhibition of angiogenesis in eye by..... 599
 intracellular signaling of 600
 mode of action of..... 600
 neurotrophic function of..... 597
 phosphorylation states of..... 597
 receptor for 600
 role of extracellular protein kinases 602
 role of phosphorylation in 603
 structure function properties of 598
 structure of..... 597
- Plant cell wall..... 157
- Plasticity..... 435
 of process..... 435
- Pluripotent hematopoietic stem cell (HSC)..... 137
 gene expression promiscuity of 138
- Polyglutamine (polyQ)..... 189
 protein trafficking of..... 189
 role in neurodegeneration 189
- Polymerase chain reaction..... 78
- PolyQ aggregates 190
 neuropathology/neuronal dysfunction in 190
 relationship of 190
- PolyQ proteins..... 189
 effect on intracellular trafficking 192
 form aggregates in neuronal nuclei/processes 189
 interactions with trafficking proteins 190
 mechanisms of 192
- Polysaccharides 157
 carbohydrate esterase families 1/8/12 of 177
 glycosyl hydrolase families 1/3 of 158
 glycosyl hydrolase families 10/11 of 164
 glycosyl hydrolase families 12, 45, 61/74 of 165
 glycosyl hydrolase families 2/35 of 162
 glycosyl hydrolase families 27/36 of 168
 glycosyl hydrolase families 5/26 of 162
 glycosyl hydrolase families 51/54/62 of 172
 glycosyl hydrolase families 53/67/93/95 of 174
 glycosyl hydrolase families 6/7 of 163

glycosyl hydrolase family 28 of	168	genes induced by	501
glycosyl hydrolase family 31 of	170	modular <i>cis</i> -regulatory architecture of	501
glycosyl hydrolase family 43 of	170	modular organization/super modules of	504
glycosyl hydrolase family 78 of	175	upstream genomic sequence analysis of	503
identified in <i>Aspergillus nidulans</i> genome	158	upstream sequence analysis of differentially	
of <i>Aspergillus</i>	158	expressed genes of	504
polysaccharide lyase families 1/3/9 of	175	Repeat expansions/contractions	145
polysaccharide lyase families 4/11 of	177	regulation of	148
unclassified feruloyl esterases of	177	regulated by CPG methylation	150
Post-genomic era	207	Reperfusion injury	449
genes in	207	apoptosis/necrosis in	455
genome evolution in	207	coagulation after	455
genome-wide search for	210	complement system in	454
human diseases in	207	cytokines in	450
Prion diseases	1	heat shock proteins (HSPs) in	454
candidate gene identification in	7	inflammatory reaction in	450
differential gene expression in	6	leukocytes in	453
fine mapping QTL in	6	studies using transgenic/knockout mice	449
genetic background of	7	Replication-dependent chromatin assembly	228
genetic susceptibility to	1	Replication-independent chromatin assembly	231
human studies of	7	Reporter gene-tagged BAC construct	525
identification of other genes in	4	regulatory sequences in	525
in humans	1	RET receptor	615
in mice	1	Retinopathy	315
prion strain selection in	7	Reverse cholesterol transport	117
role of <i>PRNP</i> in	1	A member 1 transporter (ABCA1) in	117
Promoter regions	280	apolipoprotein AI (Apo AI) in	119
large-scale comparative studies	280	by adenosine triphosphate binding cassette in	117
Prostate cancer metastasis	335	cholesteryl ester transfer protein (CEPT) in	120
development/malignant progression of	335	hepatic lipase (LIPC) in	120
HuMETCAM/MUC18 in	335	treatment with hypolipidemic drugs of	120
MUC18 in	335	Reverse genetics	584
Protein C pathway	405	in evolution of sex determination	584
in disease	405	Rhabditidae	580
role of	405	variation in mating system in	580
Protein RNA recognition	480	RNA transfection	401
computational approaches to	480	Sever bleeding diathesis	383
Psoriasis	39,51	classification of FVII/FX deficiencies in	389
clinical features of	51	clinical manifestations of	391
clinical genetics of	51	FVII assays for	387
epidemiology of	54	FVII/FX activation in	386
future perspectives of	57	FX assays for	389
MHC gene in	39	inherited coagulation factor VII/X deficiencies	
Psoriasis susceptibility locus (PSORS1)	45	associated with	383
current state of research of	45	inherited FVII/FX deficiencies in	389
future directions for	47	molecular genetics of	383
Putative <i>Aspergillus nidulans</i> plant cell wall		pathophysiology of	383
polysaccharide degrading enzymes	179	siRNA	478
comparison of	179	application to pathology	478
Receptor tyrosine kinases	613	Skeletal muscle cells	293
signal transduction by	613	effect of dysferlin	294
Reendothelialization	434	effect of dystrophin glycoprotein complex	294
and neointima formation	434	effect of M-cadherin	294
Reovirus infection	501		
gene expression analysis of	503		

effect of phosphofruktokinase	296	analysis of transcriptome of	199
effect of T-tubules	295	clinical microbiology consequences of	202
Skeletal muscle diseases	302	design of axenic medium allowing cell-free	
animal models of skeletal muscle disease	302	cultivation of	202
role of caveolin-3 null mouse in	302	functional annotation of	196
role of WT caveolin-3 transgenic mouse in	302	genome of	195
role of P104L caveolin-3 mutant transgenic		genomic rearrangement of	196
mouse in	303	in energy-generating system	196
Supermodules	506	in experimental conditions	199
Synthesis	441	microarray of	201
fibrinogen/fibrin in	443	microarray perspectives of	198
of vitamin K-dependent proteins in vessel wall	441	multiple copies genes to	196
Tanscriptome	619	post-genomic analysis of	197
of FANTOM3	619	post-genomic era of	195
Thrombogenicity	442	proteome analysis of	197
contribution of coagulation proteins to	442	repeated sequences of	196
Tissue factor	367,375	role of regulatory proteins in	196
as member of cytokine receptor class II family	368	sequences within 23S rRNA	198
discovery of PARS as coreceptors for	371	<i>Tropheryma whipplei</i> genome	195
functional evolution of	367	amino acid metabolism of	196
in angiogenesis	377	analysis of	195
in cell biology	378	clinical microbiology consequences of	202
in insects	368	comparative genomics of	197,201
in malignant tumors	375	effect on antibiotic susceptibility	202
in metastasis	377	effect on trimethoprim	202
intracellular domain of	368	enhanced sensitivity of PCR detection in	202
resembles cytokine receptor signaling in		functional annotation of	196
activation of Janus kinases	369	GC content of	196
role in cancer	375	genome size of	195
TNR expression	564	genomic rearrangement of	196
and fragile sites	565	in energy-generating system	196
Transgenic adenocarcinoma mouse prostate	336	lack for type-III/type-IV secretion system in	196
Transgenic mouse models	93	microarray of	201
advantages of	93	microarray perspectives of	198
limitations of	93	multi-spacer typing-based epidemiology of	202
Transplant arteriopathy	431	role of regulatory proteins	196
endothelium in	433	TSS-TAG library	282
pthogenesis of	431	Tumor angiogenesis	462
smooth muscle cell progenitor cells in	434	activation of	462
Transplant arteriosclerosis	431	role of TF/thrombin in	462
<i>Tribolium</i>	572	role of tissue factor in	462
analysis of segmentation genes in	572	Tyrosine kinase receptors	613
systematic approach to analysis of homeotic		cancer biology	613
genes in	572	global expression profiles to study implication for	
Trinucleotide	145	signaling of	613
biased embryos hypothesis of	145	Uric acid nephrolithiasis	207
epigenetic regulation of	145	comparative genomic approach to	212
repeat expansions/contraction of	145	fine-mapping for	210
role in morphological evolution	145	molecular experiments of	212
Trinucleotide repeats	563	sequence analysis in	212
origin expansion of	563	Vascular progenitor cells	431
secondary structures of	564	in development of transplant arteriopathy	431
<i>Tropheryma whipplei</i>	195	Vectors	14
amino acid metabolism of	196		

Vertebrates	153	VLDL biosynthesis	540
model in	153	in liver.....	540
