

SUBJECT INDEX VOLUME 7

- Aging 263
 effect of caloric restriction on 264
- Alzheimer's disease (AD) 293
 brain aging in 293
 chemical genetics of 293
 gene expression profiles of 293
 genes associated with 293
 mouse brain level in 293
- Anaphase promoting complex 263
 in aging 263
 of longevity 263
- Aneuploidy 436
- Antibiotic resistance 172
 molecular detection of 172
- Bacillus subtilis* 166
 inter-genic distance distribution of 166
- Bacteria 171
 β -lactamases by 171
 molecular detection of 171
- Bacterial stationary-state mutagenesis 481
 as stress-induced cellular adaptations 481
 role of epigenetics 481
- Bietti crystalline dystrophy 276
 CYP4V2 in 276
- Biological complexity 108
 nonlinear dynamic components of 108
- Bone development 137
 at embryonic stage 137
 histomorphometry of 138
 inherited disorders of 139
 role of growth factors 139
 role of hormones 139
- Brain dysfunction 296
 chemical genetic approaches to 296
- Brain-specific genes 11
 not detected by microarrays 11
- Breast carcinoma 523
in situ 523
 molecular classification of 523
 multiplex ligation-dependent probe
 amplification assay (MLPA) of 526
- Caloric restriction (CR) 264,295
 during aging process 295
 genetics of 265
 ideas for 268
 regulation of hypothalamic gene expression
 profile by 295
- Cancer 323,388,399
 abundance-based microarrays for 400
 biomarkers for 399
 function-based microarrays for 401
 integrin-linked kinase in 324
 molecular motor atpases/helicases
 implicated in 388
 proteins vs. DNA microarrays for 400
 reverse-phase arrays (RPA) for 400
 role of expression microarray proteomics 399
 role of surface chemistry 401
- Cerebellar ataxia 347
 associated with CoQ10 deficiency/A
 mutation in aprataxin 347
- Chondrogenesis 146
 model for 146
- Chromatin remodeling 395
 DNA replication in 395
- Chromosomal mosaicism 218
- CNS 217
 genetic alterations in 217
 transposon-mediated genetic changes in 218
- Coenzyme Q₁₀ (CoQ₁₀) 343
 biosynthesis of 343
 conserved nuclear genes of 343
 deficiency due to mutation in para-
 hydroxybenzoate-polyprenyl transferase 346
 genetics of deficiency of 343
 identification of human biosynthesis
 genes for 345
 pathogenic mechanisms in deficiencies of 346
- Complex diseases 59
 detecting sequence-sequence interactions for ... 59
 hypothesis tests for 61
 model for 59
- CYP2R1 275
 in vitamin D3 defect 275
- CYP4F22 275
 in ichthyoses 275
- Cytochromes P450 (P450s) 273
 CYP20A1 as 278
 CYP2A13 as 276
 CYP2S1 as 276
 CYP2U1 as 277
 CYP2W1 as 277
 CYP3A43 as 278
 CYP4A22 as 278
 CYP4F12 as 277
 CYP4X1/CYP4Z1 as 277
 in databases 273
 in genetic disease 274
 in human genome project 273
- Dictyostelium discoideum* 245
 endogenous regulators in development of 248
 mGluR-like gene in 247
 role of GABA/glutamate 248
- DNA damage 391
 mediated by MCM helicase-DNA
 polymerase 391
 sensor for 477

- DNA double-strand breaks (DSBs) 311
- DNA helicases 387
 catalytic functions of 393
 implicated in replication fork stabilization 387
 to stabilize replication fork 387
- DNA isolation kits 73
 to extract DNA from whole blood samples 73
- DNA repair 490
- DNA replication 390
 MCM helicase complex in 390
- E3 ubiquitin ligase 509
 APC complex subunits of 515
 BTB family of 515
 components of 511
 CUL4-DDB1 subunits of 515
 cullin family of 514
 expression patterns of/molecular interactions of 515
 F-box family of 514
 organization of 510
 regulation by degradation 509
 SKP1-like family of 514
- Elispot IFN- γ assays 255
- Embryonic stem (ES) 217
- Epigenetic 328,483
 for activation of mutator phenotype 489
 integrins and 328
 mechanisms of 483
 reprogramming of 489
 role in adjustment of cellular functions 483
- Epithelial ovarian cancer 115
 characteristics of metastasis in 124
 classification of 121
 classification of hereditary/BRCA 1/2-linked EOC with sporadic type 124
 diagnostic markers for 126
 gene expression profiling of 115
 signal transduction pathways in 129
 staging/grading of 122
 targeted therapy for 129
- Estrogen 497
- Estrogen receptors 497
 cell functions regulated by 501
 direct association to DNA 499
 genomic activity of 499
 indirect association to DNA 499
 integration of nuclear/extranuclear action of ... 502
 non-genomic activity of 500
 structure of 498
- Evolutionary genomics 227
 assumption-dependent methods for 230
 cookbook mentality for 230
 data analysis in 227
 issues of scientific method to 227
 recommendations for 230
 role of positive Darwinian selection 229
 statistical methods for 230
- EXT gene family 137
 cloning of 141
- EXT1 142
- EXT2 142
 functional/genetic analysis of 137,140
 functions of 142
 in disease 142
- Extended-spectrum β -lactamases (ESBLs) 171
 detection of organisms producing 173
 genotypic detection of 173,175
 genotypic detection of CTX-M based 174
 phenotypic detection of 173
- Familial cerebellar ataxia 346
 by CoQ₁₀ deficiency 346
- Familial hemiplegic migraine 3
- Familial typical migraine 4
 role of chromosome 1 in 4
 role of chromosome 4 in 5
 role of chromosome 6 in 6
 role of chromosome 11 in 6
 role of chromosome 14 in 6
 role of chromosome 15 in 6
 role of chromosome X in 6
- Fish 50
 ancestral bony vertebrate genome of 51
 differential evolution of transposable elements in 51
 divergent paranome evolution in 50
 sex chromosomes in 52
- Fish genomes 43
 comparative genomics of 43
 evolutionary fate of duplicated genes in 47
 fish-specific genome duplications to 47
 projects for 44
 vertebrate evolution of 43
- Functional divergence 87
 analysis of 89
 in caspase families 92
 of JAK proteins 90
 of protein sequences/applications in functional genomics 87
 of vertebrate gene families 90
 predicting type-I (rate-shift) based 87
 prediction of critical amino acid residues of 89
 software (Diverge) for 89
 statistical modeling for 87
- Functional genomics 87
 type I functional divergence for 87
- Gain-of-function mutations 471
 of c-KIT gene in familial/multiple GISTs 472
 of c-KIT gene in sporadic GISTs 471
 of PDGFRA gene in GISTs 472
- Gastrointestinal stromal tumors (GISTs) 469
 cellular origin of 470
 gain-of-function mutations of receptor

- tyrosine kinases in 469
molecular target therapy for 472
- Gene 79,97
alternative polyadenylation of 102
alternative promoters for 101
alternative splicing of 101
building biological complexity with 97
characteristics of metastasis in 125
classification of 121
classification of hereditary/BRCA1/2 linked
 EOC with sporadic type 124
diagnostic markers for 126
editing of 102
effect of RNA modifications 104
function of 98
inverse profiles of 82
modular biology for 107
molecular mechanisms for 99
mRNA localization of 102
noncanonical translation events of 104
phylogenetic reconstructions for 80
phylProM database 81
regulation of 98
role of inteins 105
role of interactome 105
role of noncoding RNAs 104
role of proteome 104
role of transcriptome 99
scale-free networks for 106
signal transduction pathways in 129
somatic recombination of 101
staging/grading of 122
structure of 98
targeted therapy for 129
- Gene expression 197
 based on Fourier approximations 197
 clustering periodic patterns of 197
- Gene expression profiling 115
 comparison of 124
 of epithelial ovarian cancer 115
 prognosis of survival time/prediction of
 response toward chemotherapy based on 127
 staging/grading of 122
- Gene structure prediction 283
 AB initio 285
 contemporary progress in 283
 homology-based 283
 SSs sensors performance in 286
- Gene transcription 497
 role of estrogen signaling multiple pathways .. 497
- Genetic regulatory networks 333
 candidate functional blocks in 335
 dynamic behavior of 333
 functional abstractions of 337
 functional data of 338
 functional decomposition of 333
 kinetic parameters of 337
 role of functional blocks 337
 role of higher-level abstractions 333
- Genome 209
 duplication of 228
 probing for 209
- Genomic integrity 477
 multiple functions of Rad9 for preserving 477
- GI mesenchymal tumors 469
 pathological classification of 469
- Hereditary multiple exostoses 140
 model for 146
- Hsp93 240
 as associated chaperone 240
- Human disease 388
 molecular motor atpases/helicases
 implicated in 388
- Human Rad9 (hRad9) 477
 exonuclease activity of 478
 in apoptosis 479
 in cell cycle regulation 478
 in DNA synthesis 478
 in embryogenesis 479
 in ribonucleotide synthesis 478
 in transcriptional regulation of 479
 phosphorylation of 479
- Human stem cells 427
 high-precision genome surgery in 427
 prokaryotic SSR systems for 427
 risks associated with SSR in 430
 targeted homologous recombination in 431
- Human transcripts 81
 cellular roles of 81
- Humans 191
 third molar agenesis in 191
- IGF-1 gene 19
 molecular structure of 19
- Inflammatory bowel disease (IBD) 149
 ABCG2 in 156
 CD14 in 152
 cytokine in 154
 DLG5 in 153
 DLG5 in 156
 DLG5 in 156
 FAS-ligand in 156
 GCR in 156
 gene polymorphisms in 154
 gene-protein function in 150
 genes involved in recognition of bacteria for .. 150
 genetics of 149
 genomewide scan associations in 150
 HLA genes in 154
 infliximab in 156
 MDR1 in 156
 mucosal integrity/transport in 153
 multidrug resistance in 154
 NAT1-2 in 156
 NOD1/CARD4 in 152
 NOD2/CARD15 in 156
 pharmacogenetics of 149
 steroids in 156
 sulfasalazine/5-aminosalicylate in 156

- TNF in 156
 toll-like receptors in 152
- Insulin-like growth factor-1 isoforms 19
 beneficial/detrimental for muscle function 21
 critical role of 19
 effects of expression in skeletal muscle 22
 in muscle aging/disease 26
 in muscle development 23
 in physiopathology of skeletal muscle 19
 muscle mass induced by over-expression 23
 over-expression of 21
 signaling in muscle regeneration/disease 27
 signaling in myocyte differentiation 24
 signaling in myocyte hypertrophy 25
 upstream/downstream of 20
- Integrins 323
 and growth factors 326
 and HoxD3 326
 and insulin-like growth factor 327
 and matrix metalloproteinases 326
 epigenetics of 323
 gene expression of 323
 in cancer 323
 metastasis in 323
- Internal ribosome entry sites (IRESes) 205
 cellular type 207
 differential translation state array analysis of .. 211
 mediated translation regulation 213
 whole-genome identification of elements of ... 205
- Intracerebral neoplasms 253
 antigenic differences in 253
 DNA-based vaccine for 253
 normal/malignant cells in 253
 treatment of 253
- Ionotropic glutamate receptors (iGluRs) 245
 comparison of ligand binding domains of 246
- Isopentyl transferases 36
 experimental model for studying 36
 in phytohormone synthesis/plant
 differentiation 36
- β -Lactamases 171
 organisms producing 171
- Lassa virus (LASV) 351
 genome of 351
 glycoproteins of 365
 GP1/cell receptor binding on 366
 GP2/membrane fusion on 367
 L RNA/encoding proteins of 368
 morphology/structure of 356
 nucleocapsid protein of 363
 replication strategy of 359
 RNA polymerase of 368
 S RNA/encoding proteins of 362
 viral RNA/genome structure of 357
 Z protein of 370
- Lassa-related viruses 353
 GP1/cell receptor binding on 366
 GP2/membrane fusion on 367
 L RNA/encoding proteins of 368
 morphology/structure of 356
- nucleocapsid protein of 363
 replication strategy of 359
 RNA polymerase of 368
 S RNA/encoding proteins of 362
 taxonomy/phylogeny of 353
 viral RNA/genome structure of 357
 Z protein of 370
- Lassa virus signal peptide 365
- Learning/memory 295
 gene expression associated with 295
- Linkage disequilibrium 467
- Longevity 264
 genome wide screens enhancing genes of 267
 heritable conserved genetic program of 266
 theories of 264
- Mammalian tumorigenesis 481
 as stress-induced cellular adaptations 481
 role of epigenetics 481
- Mammals 51
 differential evolution of transposable
 elements in 51
 sex chromosomes in 52
- Metabotropic glutamate receptor 245
 comparison of ligand binding domains of 246
 evolutionary divergence genes of 245
 in *Dictyostelium discoideum* 245
 ligand binding domain of 245
- Metallo- β -lactamases 171
 detection of organisms producing 176
 genotypic detection of 176
 phenotypic detection of 176
- Microarray proteomics 418
 application of 418
 for cancer biomarkers 418
- Microarrays 11,405
 detection of expression differences by 12
 for sampling same population 14
 for separating data from noise 13
 in brain research 11
 limitations of 405
 role of clustering apples/oranges 14
- Migraine 1
 as risk factor for medical condition 7
 association studies in 6
 co-morbidities of 8
 genetic of 2
 identification of responsible genes for 1
 in cerebral white matter lesions 7
 in patent foramen ovale 7
 in stroke 7
 linkage studies in 4
 molecular genetics of 1
 pathophysiology of 1
- Minichromosome maintenance (MCM) 390
 and replisome progression complex 391
- Mitochondrial diseases 345
 by deficiency of CoQ₁₀ 345
