

SUBJECT INDEX TO VOLUME 10

<p>A_{2A} Adenosine receptor antagonists 261 7<i>h</i>-pyrazolo[4,3-<i>e</i>][1,2,4]triazolo[1,5-<i>c</i>] pyrimidines with oxygenated chains as 261 pyrazolo[4,3-<i>e</i>][1,2,4]triazolo[1,5-<i>c</i>] pyrimidines <i>n</i>-⁵ urea/amide as 264</p> <p>Acetate aldols 1981 Mukaiyama aldol reaction of 1981 <i>via</i> silyl enol ethers 1981</p> <p>Acetate/methyl ketones 1985 and chiral auxiliaries 1985</p> <p>Acetate/methyl ketone aldol reaction 1975,1988</p> <p>Acetylcholinesterase 825 alkaloid inhibitors of 828 assays based on colorimetric methods for 825 assays based on fluorimetric methods for 827 assays based on immobilized enzyme for 828 assays based on mass spectrometric detection for 827 assays based on a radiometric method for 827 assays for 825 effect of amaryllidaceae 830 effect of buxaceae 833 effect of galanthamine 829 effect of huperzine A 829 effect of physostigmine 828 HPLC assay for 827 inhibitors 825 non-alkaloid inhibitors of 838 TLC assays for 826</p> <p>AchE inhibitors 842 from microorganisms 842 of animal origin 843</p> <p>Activated ketones 1533 catalysts for 1534 heterogeneous catalytic enantioselective hydrogenation of 1533 modifiers for 1537</p> <p>Acyclic α-nitro ketones 2151 one-pot preparation of 2151</p> <p>Acyclonucleosides 335</p> <p>Acyclovir 335 pyrimidine analogues of 335</p> <p>Acyl halides 2374 addition of 2374</p> <p>Adenosine antagonists 265 C²-/C⁹-substituted pyrazolo[4,3-<i>e</i>] [1,2,4]triazolo[1,5-<i>c</i>]pyrimidines as 265</p> <p>Adenosine deaminases (ADA) 1208</p> <p>Adenosine receptor antagonist 260 pyrazolo[4,3-<i>e</i>][1,2,4]triazolo[1,5-<i>c</i>]pyrimidine template as 260</p> <p>Agrochemicals 2037 biocatalysis for 2037 industrial production of 2048 synthesis of 2037</p> <p>Alcohol 1068,2238 kinetic resolution of 1068 oxidation of 2238</p>	<p>Aldol/Mannich-type reactions 158</p> <p>Alkali metals coordination compounds 35 properties of 35 structure of 35</p> <p>Alkannins 583 analytical methodology for 589 analytical methods for determination of 583 chemical analysis of 589</p> <p>α-Alkyl keto esters 1242 dynamic kinetic resolution of 1242</p> <p>Alkylidene vinylidene complexes 221</p> <p>Alkynes 1425 cyclization of 1425</p> <p>Allenylidene-ene reaction 147 Ruthenium-catalyzed carbon-carbon bond formation <i>via</i> 147</p> <p>All-retro/all-retro-inverso peptide bond surrogates 442</p> <p>π-Allyl metal species 1475 activation of 1475</p> <p>Allylboronates 1868 enantioselective allylation using 1868</p> <p>Allylic oxidation 2227 mediated by iodoxybenzene 2230 mediated by <i>t</i>-butyl hydroperoxide 2229 of unsaturated steroids 2230 of Δ^5-steroids 2229</p> <p>Allylic substrates 115 enantioselective nucleophilic substitution of 131 regioselective nucleophilic substitution of 130 Ruthenium-catalyzed nucleophilic substitution of 115 tereospecific nucleophilic substitution of 130</p> <p>π-Allylpalladium derivatives 1335</p> <p>η^3-Allylruthenium complexes 115 Carroll rearrangement catalysed by 129 <i>endo-exo</i> isomerism in 115 reactive intermediates from 116</p> <p>η^3-Allylruthenium(IV) complexes 118 with nitrogen ligands 118 with phosphorus ligands 119</p> <p>Allyltributylstannane 1944 hydrogen transfer/allylations with 1944</p> <p>Alocoholysis 1095 as transesterification reaction 1095 chemoselectivity in 1099 cyclic substrates for 1110 immobilized lipases in 1096 in organic solvents 1095 influence of structure of reacting species 1097 lipase-catalyzed deacylation by 1095,1098 regioselectivity in 1099 role of aromatic compounds 1114 role of bicyclic compounds 1112 role of organometallics 1115 role of steroids 1112 selectivity of enzymatic type 1099</p>
--	---

solvent effect on	1096	with isocyanates/isothiocyanates	2384
stereoselective type	1106	with ketenes	2388
Amide	686,688	Azetidinone	809
based modified RNA	688	ammonolysis/aminolysis of	809
Aminoazoles	311	Azide/alkyne-click reaction	1791
reactions of	311	applications in material science/organic	
Aminolysis	811	synthesis	1791
of benzylpenicillin/HSA	811	in dynamic combinatorial libraries	1811
α -Aminophosphonic acids derivatives	2320	on polymers/dendrimers	1796
Aminophosphonium salts	2374	on surfaces	1795
synthesis of	2374	onto biomolecules	1800
3-Aminopyridazines	289	Baeyer-Villiger monoxygenases (BVMOs)	1265
preparation of	289	biochemistry of	1266
Ammonolysis reactions	1126	biotransformations with	1270
mechanism of	1126	in desymmetrizations	1272
resolution of β -aminoesters by	1135	in kinetic resolutions	1277
resolution of amines by	1129	in regiodivergent transformations	1279
resolution of aminoalcohols by	1136	mechanism of	1266
resolution of diamines by	1133	metabolic role of	1268
resolution of primary monoamines by	1130	structure of	1267
resolution of secondary amines by	1135	synthetic application of	1269,1271
Antimicrobial peptides	569	Baeyer-Villiger oxidations	1265
lipid bicelles of	573,575	enzyme mediated	1265
lipid micelles of	570	in desymmetrizations	1272
NMR spectroscopy of	569	in kinetic resolutions	1277
structural biology of	569	in regiodivergent transformations	1279
three-dimensional structures of	570	Base	1976
Antiviral drugs	1289	transient chirality in	1976
Arenes	1817	Base catalyzed reactions	1628
secondary amides as <i>ortho</i> -directed		henry reactions	1634
metallation groups for	1817	isomerization of glucose in fructose	1633
Aromatic compounds	1603,1612	Michael additons as	1629
regioselective acylation of	1612	of acetoacetates	1630
regioselective halogenation of	1616	of natural fats	1630
regioselective methanesulfonylation of	1614	of oxidation of secondary/tertiary amines	1635
regioselective nitration of	1603	transesterification as	1629
Aromatic epoxides	1620	Wadsworth-Emmons reactions as	1632
rearrangement of	1620	Benzo[b]furans	1423
Aromatic molecules	745	construction of benzenoid ring	1445
computacional studies of	745	functionalization of	1447
intermolecular interactions of	745	intramolecular Heck reaction of	1440
magnitude/physical origin of	745	palladium-catalyzed assembly of	1423
Aromatic secondary amides	1820	strategies in palladium-catalyzed	
Aryl-/heteroaryle-substituted cyclopentadienes	937	synthesis of	1423
catalysed cross-coupling reactions of	946	Benzophospholes	59
in transition metal chemistry	949	Bicyclic peptides	2085
preparation of ligands of	938	Bicyclooctenes	90
ring closure reactions of	938	as phosphorylating agent	90
selected applications of	949	Biocatalysis	1053,1217,1289,2037
synthesis of	937	application of	1230
use in transition metal chemistry	937	<i>Candida rugosa</i> lipase as	1054
Aza-Diels-Alder reactions	981	for enzymatic acyloin condensation	1313
diastereoselective	981	for fungicides	2040
enantioselective	991	for herbicides	2037
stereoselective	981	for insecticides	2045
Aza-Wittig reaction	2383	for redox reaction	1219
with cumulene, C=X double bonds	2383	hydrogen sources for	1221
with carbon dioxide/carbon disulfide	2383	in deracemization reduction	1244

in synthesis of charal intermediates	
for pharmaceuticals	1289
modification of	1221
paclitaxel semisynthesis in	1292
preparation in large quantity	1219
reduction of aldehydes by	1243
reduction of diketones by	1238
reduction of keto esters by	1239
reduction of ketones by	1230
<i>Rhizomucor miehei</i> lipase as	1055
screening for	1217
Biocatalytic reduction	1217
in medium engineering	1225
in organic solvent	1225
in supercritical carbon dioxide	1228
of carbonyl groups	1217
Biomimetic alkylation-cyclization cascade reaction	2274
Biomimetic cyclization	2259
chemical modification in	2259
of functionalized isoprenoid polyenes	2259
of hydroxy substituted acyclic substrates	2271
substituted acyclic substrates of	2266
synthetic opportunities of	2259
Biomolecular NMR spectra	555
chemical shift restraints of	559
dipolar coupling restraints of	558
internal mobility of	561
J-coupling restraints of	558
molecular dynamics/ensemble refinement of	563
Overhauser effect analysis of	561
quantitative analysis of	555
residual dipolar coupling/mobility of	563
spectral assignment of	556
structure quality by	560
Biopolymers	549
hemoglobin interactions with	549
Bioradicals	528
direct <i>in vivo</i> detection of	528
identification of	528
induced by chemicals /metals	529
observation of	528
Biosynthesis	625
of carbocyclic polyols in nature	625
Bis(allyl)-Ruthenium(IV) complexes	165
catalytic applications of	174
in catalytic reactions	179
in isomerization of allylic alcohols	176
in isomerization-transfer hydrogenation	
tandem reactions	178
in polymerization of butadiene	174
in polymerization of norbornene	174
in transfer hydrogenation of carbonyl compounds	175
precursors for catalytic organic synthesis	165
reactivity studies of	166
synthesis of	166
Bridged polysilsesquioxanes	1720
Bromopyridazines	389
Calixarenes	2317
functionalized by chiral groups	2317
inherently chiral type	2322
<i>Candida rugosa</i> lipase	1053
as biocatalyst	1053
biochemical characterization of	1056
catalytic activity of	1062
CRL-catalysed transesterification of	1059
enzymatic loading (quantity) on catalytic	
activity of	1058
heptyl oleate synthesis of	1058
hydrolytic activity of	1062
in production fermentation processes	1054
synthesis in organic media	1060
Carbanucleosides	341
Carbocyclic L-unsaturated nucleosides	346
Carbocyclic nucleosides	351
with bicyclic ring sugar	351
Carbohydrates	663,1164,1745
biochemical methodologies in	1164
major groove recognition of DNA by	663
non-conventional glycosidic linkages in	1745
structure of	1745
synthesis of	1745
three-bond glycosidic connections in	1745
Carbon nucleophiles	1898
selenocyclization with	1900
Carbonyl compounds	965
low-valent titanium-mediated reductive	
coupling of	965
McMurry coupling reaction of	969
Pinacol coupling reaction of	965
Carbonylative cyclization	1429
of <i>o</i> -alkynylphenols	1429
Carbopalladation reactions	1331
terminated by π -allyl trapping by nucleophiles	1333
one step bicyclization in	1337
3 α -Carboxypenam anion	810
aminolysis of	810
Cartilage	1771
architecture of	1772
atomic force microscopy of	1785
biophysical properties of	1778
characterization of	1781
collagen structure in	1774
composition/structural properties of	1772
degradation in rheumatic disease	1786
extracellular matrix of	1772
in health/disease	1771
macromolecular properties of	1783
minor components of	1777
molecular organization of polymers of	1771
osmotic activity of	1778
spectroscopy of diseased type	1784
Cascade metathesis processes	1381
synthesis of heterocycles by	1381
Catalysts	151

Catalytic C-C bond formation	2191	as chiral catalysts	1925
in natural products synthesis	2191	hydrosilylation of ketones imines	1924
Catalytic chiral organoselenium compounds	1921	in enantioselective conjugate addition of	
enantioselective synthesis mediated by	1921	Grignard reagents to enones	1928
deselenylation reactions of	1921	Chiral intermediates	1289
Catalytic oxidaton	2239	for α 1-adrenoreceptor antagonist	1316
mediated by oxidants	2240	for β 2 receptor agonist	1310
mediated by oxygen/air	2240	for β 3-receptor agonist	1309
mediated by <i>t</i> -butyl hydroperoxide	2239	for abacavir	1292
of steroidal allylic alcohols	2243	for ACE/NEP inhibitors	1300
of steroidal homoallylic alcohols	2244	for anti-Alzheimer's drugs	1312
of steroidal saturated alcohols	2242	for anticancer drugs	1292
of steroidal saturated 3-alcohols		for anticholesterol drugs	1303
to 3-ketone	2239	for antihypertensive drugs	1298
other steroidal allylic alcohols	2244	for antiinfective drgus	1315
Catalytic reactions	1900	for antiileukemic agent	1297
Cation/ π interaction	759	for atazanavir	1289
physical origin of attraction in	759	for calcium channel blockers	1307
Cationic RuHAP catalysts	243	for crivivan	1291
aldol/Diels-Alder reactions by	244	for deoxyspergualin	1297
preparation/characterization of	243	for enantioselective enzymatic cleavage of	
Cationic six-coordinate complexes	228	carbobenzyloxy groups	1317
CH/ π interaction	756	for endothelin receptor antagonist	1316
directionality of	758	for lobucavir	1292
for structures of molecular assemblies	758	for melatonin receptor agonist	1308
magnitude of	757	for NK ₁ /NK ₂ dual antagonist	1318
of aliphatic hydrocarbon complexes	758	for orally active taxane	1296
of benzene-ethylene/benzene-acetylene		for potassium channel openers	1307
complexes	758	for retinoid receptor gamma specific agonists ...	1314
of benzene-methane complex	758	for thromboxane A2 antgonists	1306
of benzene-substituted hydrocarbome complexes ..	758	for tryptase inhibitor	1311
of ethylene/acetylene complexes	758	Chiral nitrogenated compounds	1125
of tetramethylammonium complex	759	by ammonolysis	1125
role of electrostatic interaction	758	by enzymatic aminolysis	1125
Chemical diversity	283	of esters	1127
preparation of 3-aminopyridazines with	283	preparation of	1125
Chemical vapor deposition	1021	Chiral organoselenium compounds	1905
methodologies for	1022	amidosenenylation of	1908
precursor design of	1024	asymmetric synthesis of	1905
role of metal β -diketonate complexes	1025-1027	azidoselenenylation of	1908
role of metal azolato complexes	1029	carbosenenylation of	1909
role of metal allylimido complexes	1029	chiral substrate-controlled methods for	1905
Chemoselective hydrogenations	1676	meso-epoxides approaches to	1910
Chinese higher fungi	849	methoxyselenenylation of	1907
biologically active metabolites from	849	optically active selenium ylides approach to	1910
Chiral auxiliary-controlled methods	1914	prochiral olefin approach to	1905
for enantioenriched seleno alcohols	1914	selenocyclization of	1905
Chiral dienes	990	α,β -unsaturated ketones approach to	1909
Chiral discrimination	695	Chiral selenides	1929
large vs. small effect in	695	as catalysts	1929
optical rotatory power studies of	711	as ligands for enantioselective synthesis	1929
phase effects of	695	Chiral selones	2000
positive vs. negative	696	Chirally transformed pseudopeptides	433
studies of	701	as novel elements for synthetic vaccines	433
theoretical studies on	695	as therapeutic agents against malaria	433
use of metals for	710	Chiroselection	434
Chiral diselenides	1924	origin of homochirality in living systems	434
as catalysts ligands for enantioselective		Chromium catalysts	955
synthesis as	1924	application of	961

for β -diketimination complexes	958	Cyclohexyl nucleosides	353
for olefin polymerization	955	Cyclooctene	207
for salicylaldehyde complexes	960	ring-opening metathesis polymerization of	207
Cobaltocenes	945	CyclopentadienylCR(III) complexes	956
addition of C-nucleophiles to	945	Cyclopentenones	943
Collagen	1780	addition of C-nucleophiles to	943
isolation of	1780	Cyclopeptide	2075
Conjugated dienes	2008	angiotensin I-converting enzyme inhibitory	
mechanism of cheletropic additions of		activity of	2113
sulfur dioxide to	2027	anti-inflammatory activity of	2108
mechanism of hetero-Diels-Alder additions		antimicrobial activity of	2107
of sulfur dioxide to	2008	antineoplastic activity of	2111
Conserved antigens	433	as research tool	2111
α -carbon asymmetry of	433	based alkaloids	2077
peptide bond restriction of	433	bioactivity of	2075
Crown ethers analogs	656	biological activities of	210
from sucrose	656	chemical detection of	2088
Cyclic 1,3-dicarbonyl compounds	142	classification of	2076
cycloaddition of	142	estrogenic activity of	2113
Cyclic peptides	2080	hepatotoxic activities of	2109
in higher plants/higher fungi	2096	hepatotoxic constituents of	2109
proline-rich based	2080	inhibitory effects on tryptophan/tryptamine	
tryptophan-rich based	2084	formation	2108
with hydrophobic amino acids	2080	insecticidal/acaricidal activities of	2018
Cyclization	1430,1458	mass spectrometry of	2089
by activation of triple bond of enynes	1465	naturally-occurring type	2075
of alkenes	1439	NMR spectroscopy of	2090
of <i>o</i> -alkynylphenols	1430,1437	sedative activity of	2113
via C-H activation of methoxy groups	1443	special techniques used for structure	
via cyclometallation pathway	1458	elucidation of	2089
via intramolecular C-O bond forming		structures of	2075
reactions	1444	uterotonic activity of	2113
via intramolecular coupling	1442	Cyclophanes	2327
Cycloaddition	145,154	Cyclopropanation	210
of propargylic alcohols phenol of naphthol		of cyclooctene	212
derivatives	145	of styrene	210
via Diels-Alder reactions	154	Cystine-rich cyclic peptide	2087
Cyclocarbonylation	1410		
via Pauson-Khand reaction	1410	Deacylation	1095
Cyclocarbonylation reactions	1397	by alcoholysis	1095
steroid/natural substrates for	1412	in organic solvents	1095
Cyclodextrins	715,731,2294,2308	Dendritic architectures	2333
association constants of	732	from phosphorus dendrimers	2345
<i>bis</i> -intercaland type receptors for	2299	synthetic pathways for	2333
computational studies on	731	Deoxyribofuranosyl-nucleosides	343
conformational changes of	732	carbocyclic analogues of	343
dimers of	2298	2-Deoxyribose-5-phosphate aldolase (DERA)	1209
enantiodifferentiation of	733	Desymetrization	1139
functionalized type	2296	of prochiral diesters	1139
geometry of	732	of prochiral glucarates	1140
inclusion complexes of	731	Dialkyl α -hydroxyiminoalkylphosphonates	2357
metalloreceptors for	2301	Diastereoselective heterogeneous	
molecular modeling of	715	catalytic hydrogenations	1575
phosphoryl/thiophosphoryl derivatives of	2308	Diazine nucleoside analogues	333
phosphorylated at narrow rim	2310	1,2-Diazines	377
<i>p</i> ^{III} phosphorylated based	2312	Buchwald-Hartwig reaction on	413
unsubstituted type	2295	carbonylation reaction on	407
Cyclodiastereomeric [3]rotaxanes	740	cross-coupling reactions with organometallic	
Cyclofunctionalization of	1959	reagents	378

Heck/intramolecular Heck-type reaction on	410	of functionalized ketones	1514
negishi reaction on	378	mechanism of	1519
oxidative addition of	377	Enantioselective addition	1879
palladium-catalyzed reactions on	377	applications in synthesis of natural products	1882
pd-catalyzed C-C bond formation on	378	to ketimines	1879
pd-catalyzed C-N bond formation on	413	to ketones	1882
Sonogashira reaction on	400	Enantioselective allylation	1867
Stille reaction	395	using allylsilanes/allylstannanes	1867
Suzuki reaction on	379	Enantioselective cyanosilylation.....	1870
1,3-Dicarbonyl compounds	236	of ketones	1870
asymmetric electrophilic functionalization of	236	Enantioselective heterogeneous	
3,6-Dichloropyridazine	279	catalytic hydrogenations	1572
preparation of 3-aminopyridazines from	279	Enantioselective hydrogenation	1573,1672
Diels-Alder cycloaddition	82	of α,β -unsaturated endocyclic ketones	1573
of dihydrophosphinine oxides	82	on anchored complexes	1672
Diels-Alder reactions	155	on encapsulated complexes	1672
with areneRuthenium complexes	155	Enantioselective organozinc addition	1850
with cyclopentadienylRuthenium complexes	155	Enantioselectivity	1550
Dienophiles	981	effect of substrate structure on	1550
derived from chiral aldehydes	981	role of Pt/alumina catalyst	1553
derived from chiral amines	984	Encapsulation	1670
Diethylzinc addition	1925	of Jacobsen's complex	1670
1,2-Dihydro-/1,2,3,6-tetrahydro-1,2,3,4,5,6-hexahy		Enzymatic aminolysis	1126
drophosphinine 1-oxides	93	mechanism of	1126
Dihydroazines	297	of esters	1127
based on α,β -unsaturated ketones reactions	297	resolution of β -aminoesters by	1135
Dihydrouracil dehydrogenase	1207	resolution of amines by	1129
Diketopiperazine	865	resolution of aminoalcohols by	1136
Dimethylene sulfones	684	resolution of diamines by	1133
1,3-Dinitroalkanes	2150	resolution of primary monoamines by	1130
one-pot preparation of	2150	resolution of secondary amines by	1135
Diphenylzinc addition	1925	Enzymes	1980
Diterpenes	855	chirality from	1980
DNA-protein interactions	419	Epoxide hydrolase	1145
from single molecule force spectroscopy		as biocatalysts	1145
measurements	419	classification of	1146
kinetics of	419	commercially available	1155
salt-dependent ssDNA binding by gp32	429	directed mutagenesis of	1157
thermodynamics of	419	diversity of	1145
Dual groove recognition	668	encoding genes for heterologous expression	1158
with novel neomycin-Hoechst 33258 conjugate ..	668	high throughput screening for	1155
Dynamic kinetic resolution	1138	mechanism of	1146
of amines	1138	reaction mechanism of	1148
of secondary amines	1139	recombinant type	1153
Electrophilic activation	1469	structure of	1146
of triple bond	1469	type I	1150
Electrophilic selenium reagents	1893	type II	1151
carbon nucleophiles as	1898	type III & V	1152
chiral based	1893	type IV	1152
nitrogen nucleophiles as	1897	wild type	1149
oxygen nucleophiles as	1895	EPR spectroscopy	521
Enamines	297	automatic control techniques in	523
reactions of	297	effect on hydrazine-based drugs	529
Enantio-differentiating catalysts	1519	effect on metal-related <i>in vivo</i> reactions	530
development of	1519	effect on nifedipine	530
Enantio-differentiating hydrogenation	1514	effect on nitroso compounds	529
of alkanones	1517	effect on oxygen	532
		<i>in vivo</i> detection of bioradicals with	521
		instrumentation of	523

low-field	522	Fluorescence	491
penetration of microwaves in	522	anisotropy of	493
Ergosteroids	850	detection of reactions by	512
Exocyclic-olefinic carbohydrate derivatives	625	in analysis of specific nucleic acid structures	511
ring contraction of	626	in cleavage reactions	512
Exocyclic-olefinic furanosides/pyranosides	628,639	in discrimination between DNA/RNA targets	511
conversion of	628	in gene expression analysis	511
functionalized five-/six-membered carbocycles	628	in insertion/deletion polymorphism	510
 		lifetimes of	492
Ferrier II rearrangement	630	quenching of	492
promoted by aluminium salts	635	Fluorescence <i>in situ</i> hybridization (FISH)	510
promoted by mercury (II) salts	630	Fluorescence resonance energy transfer	492
promoted by palladium	631	based methods	506
promoted by titanium (IV)	637	FRET formation of	492
Fine chemicals	1479	Fluorescent oligonucleotides	491
by nitroarenes	1479	amplification of	495
by reductive carbonylation	1479	analogs of	496
catalyzed by transition metal complexes	1479	applications of	506

solid phase synthesis of	1727	RNA interference (RNAi)	675
synthetic approaches for	1727	activity of 2'- <i>O</i> -alkyl/2'-f modified	681
total chemical synthesis of	1727	carbohydrate chemistry for	675
Proteoglycans	1775	chemical modifications of	676
interactions with collagen	1777	Rotaxanes	731
structural organisation of	1775	association constants of	732
Pseudopeptides	438	changes in molecular reactivity	734
as transition-state analogues	438	computacional studies on	731
<i>P</i> -terphenyls	861	conformational changes of	732
Pyranones	863	enantiodifferentiation of	733
Pyrazino[2,3- <i>b</i>]carbazoles	373	geometry of	732
Pyrazolo[4,3- <i>e</i>][1,2,4]triazolo[1,5- <i>c</i>]pyrimidine		shuttling in	737
template	259	Ru(IV)-ru(II) reductions	170
organic/medicinal chemistry approach to	259	RuCl ₂ (PNNP)] complexes	227
Pyridazino[4,5- <i>b</i>]carbazoles	364	Ru-hydroxalcalite catalysts	246
Pyridazinyl trifluoromethanesulfonates	393	preparation characterization of	246
Pyridocarbazole alkaloids	363		
diazine analogues of	363		

Ruthenium-allenylidene complexes	135	bonds	2172
Ruthenium-catalyzed novel carbon-carbon bond		for formation/cleavage of carbon-oxygen	
forming reactions <i>via</i>	135	bonds	2172
Ruthenium catalysts	217,241	for oxidation reaction	2178
bound to inorganic crystalline materials		multicomponent reaction of	2172
for environmentally-benign organic synthesis	241	preparation of	2171
design of	241	Single DNA molecules	419
for Kharasch reaction	217	force-induced melting of	419
in oxidation of alcohols	246	Solid base catalysts	1627
preparation/characterization of	242	in Henry reactions	1634
Ruthenium-catalyzed propargylic substitution reactions .	135	in isomerization of glucose into fructose	1633
Ruthenium-catalyzed ring-closing metathesis	185	in organic synthesis	1627
catalyst architecture mechanism for	192	synthesis/characterization of	1627
conformationally directed	188	Solid catalysis	2145
effects of non-ideal catalyst behaviour	189	in natural products synthesis	2152
effects of ring size	186	nitroaldol reaction under	2146
macrocycle formation <i>via</i>	187	Spectroscopic probes	477
mechanistic considerations in	185	with active bonds cleavable by metal ions	484
model lactones for	186	with active bonds cleavable by reactive oxygen	
removal of Ruthenium residues in	198	specie	486
role of pseudohalide catalysts	195	with cleavable active bonds	477
Ruthenium complexes	151,225	with cleavable phosphoester bonds	478
asymmetric cyclopropanation of styrene by	232	with enzyme-cleavable active bonds	478
enyne cycloisomerizations catalysis by	157	with glycosidase-cleavable active bonds	482
in asymmetric catalytic atom-transfer reactions	225	with lactamase-cleavable active bonds	483
lewis acid catalysis by	151	with peptidase-/protease-cleavable peptide	
with chiral tetradentate pnp ligands	225	bonds	481
Ruthenium containing hydrotalcite catalysts	245	Sphingolipids	857
Ruthenium lewis acid catalysts	152	Stannum(IV) coordination compounds	38
Schiff bases	1500	Stereoselective enzymatic acylation	1067
mechanism of formation of	1500	dynamic kinetic resolution of secondary	
β -Selective epoxidation	2331	alcohols	1070
mediated by oxidants	2235	reaction conditions for	1067
mediated by oxygen/air	2234	role in synthetic biologically active compounds ..	1078
of unsaturated steroids	2236	sequential transformations of	1077
of Δ^5 -Steroids	2234	transesterifications as	1067
Selenocyclizations	1896	Stereoselective/selenenylation reactions	1997
with oxygen nucleophiles	1896	studies on	1997
