

AN ESSENTIAL JOURNAL ON ORGANIC CHEMISTRY

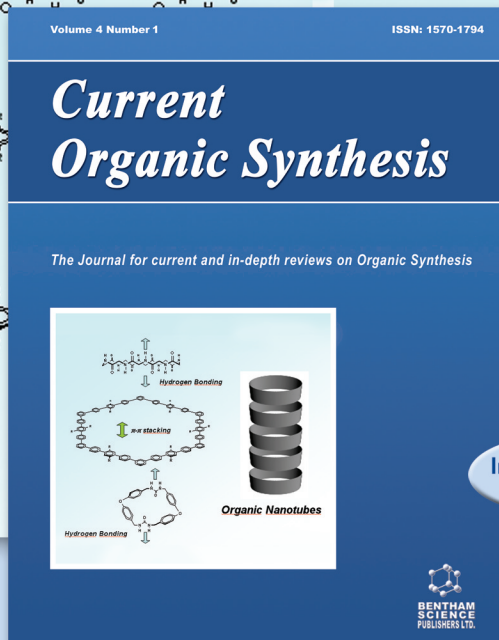

Hydrogen Bonding

π - π stacking

Impact Factor
3.95

Volume: 9, 6 Issues, 2012

www.benthamscience.com/cos

Editor-in-Chief:

Atta-ur-Rahman, Pakistan

Current Organic Synthesis publishes in-depth reviews on all areas of synthetic organic chemistry i.e. asymmetric synthesis, organo-metallic chemistry, novel synthetic approaches to complex organic molecules, carbohydrates, polymers, protein chemistry, DNA chemistry, supramolecular chemistry, molecular recognition and new synthetic methods in organic chemistry.

- Publishing Peer Reviewed Articles Rapidly
- Available in Print & Online
- Abstracted in Chemical Abstracts, Scopus, SCI Expanded and more...
- Free Online Trials for Institutions
