Current Protein & Peptide Science publishes review articles on specific aspects involving proteins, peptides, and interactions between the enzymes, the binding interactions of hormones and their receptors; the properties of transcription factors and other molecules that regulate gene expression; the reactions leading to the immune response; the process of signal transduction; the structure and function of proteins involved in the cytoskeleton and molecular motors; the properties of membrane channels and transporters; and the generation and storage of metabolic energy. In addition, reviews of experimental studies of protein folding and design are given special emphasis.

Editor-in-Chief:
Ben M. Dunn, USA

- Publishing High Quality Peer Reviewed Articles
- Available in Print & Online
- Abstracted in SCI Expanded, MEDLINE, Index Medicus, Scopus, EMBASE, EMBiology, and more...
- FREE Online Trials for Institutions
- FREE Sample Issues Available on Website
