Aims & Scope

Current Bioinformatics aims to publish all the latest and outstanding developments in bioinformatics. Each issue contains a series of timely, in-depth/mini-reviews, research papers, and guest-edited thematic issues written by leaders in the field, covering a wide range of the integration of biology with computer and information science.

The journal focuses on advances in computational molecular biology, encompassing niche areas, such as DNA/RNA/protein sequence alignment and prediction, gene and multi-source heterogeneousRead more
